Mr. Scott Rowland
TransCanada Turbines
5021 Lisa Marie Ct
Bakersfield, CA 93313

Scott;

I want to pass along a word of thanks to TransCanada Turbines for your quick response to the problems we encountered after installing our spare engine in October. Both the Field Service and Depot folk's support were instrumental in minimizing our lease engine costs and getting our spare engine back in operation.

After having TCT perform numerous hot section repairs and several major overhauls I have a high level of confidence in the experience and capabilities of the depot staff, field service techs, and project managers. The innovative approach to depot work developed by you and your sales staff has provided us with the cost savings and maintenance flexibility required to keep our budgets on track.

Please pass along my sincere gratitude to the depot and field service techs, project managers, and administrative staff that have been a crucial part of making our business relationship so successful.

Sincerely;

Jeff White
Plant Manager
